

Technical data

Wolf separating lane

- is an insulating material covering paper according to DIN 18560 part 2, paragraph 6.1.2
- lies absolutely flat on the substrate
- prevents wrinkling
- is tear-resistant
- is coated with PE on both sides and can therefore be welded with hot air - soaking is not possible.

Available as: [roll]	
Width	130 mm
Length	Roll of 100 metres
Thickness	Approx. 0,1 mm
Weight	130 g/m ²

Processing:

The Wolf separating membrane is rolled out onto the PowerFloor surface. Joints must be laid with an overlap of 5 cm to 10 cm. When doing so, lay the Wolf separating membrane right up to the edge insulation strip.
